Objectives of the workshop

There is increasing recognition that legumes such as peas, beans and lentils are well-tasting, healthy and environmentally sound food sources, and increasing the proportion of legumes in our diets will have positive consequences for the sustainable development of agriculture and food systems. In this context, the workshop will attempt to answer questions such as: What potential do European produced legumes for food have to supply our protein needs? And how can their consumption be promoted?

Place: The Crafoord hall (Sundsvägen 14), Swedish University of Agricultural Sciences (SLU), Alnarp, Sweden

Programme and speakers list (will be updated at <http://legato-fp7.eu/>)

08:45. Introduction: LEGATO structure and objectives. Richard Thompson - LEGATO coordinator

08:50. Short presentation of LegSA. Georg Carlsson - SLU; LegSA contact person

09.00 - 10.00 Session I: Levers for boosting EU Grain legume (GL) production and quality

09:00. Improving key quality traits in GL; Gérard Duc (INRA)/Ana Torres (IFAPA)

09:25. Brakes and levers on GL production for feed and food; Steve Belcher (PGRO) + Etienne Pilorge (UNIP/CETIOM representative)

09:50. Discussion

10:00. Coffee break

10:20 - 11:45 Session II : Optimizing GL for human consumption

10:20. Overview of LEGATO WP4: "Defining traits adapted to consumers' expectations"; Carlota Vaz Patto (ITQB)

10:35. Which traits for human consumption? - Consumer perception; Carla Brites (INIAV)/ Jean-Baptiste Traversac (INRA)

10:50. SME experience and feedback; Patrimus + Moulin Decollogne + GoGreen. Including a round-table discussion

11:45. Conclusion and perspectives, closing the LEGATO stakeholder meeting

12:00. Lunch

Registration online for persons not involved in LEGATO:

<http://partnerskapalnarp.slu.se/konf/20150226.aspx>

(LEGATO members will register at the collaborative platform)
